TITLE : SPEAKER SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To reproduce a sufficient low band without the need of a separate dedicated cabinet for low band reproduction or power for the low band or an amplifier regarding a speaker system provided with a box body and a speaker equipped inside the box body in the state of facing a box body front surface.

SOLUTION: The speaker device is provided with a passive radiator 30 provided with a vibration surface 31 having the lowest resonance frequency lower than the lowest resonance frequency of the speaker 20 facing the inner wall surface of the box body 10 equipped inside the box body 10. The box body 10 is provided with a plurality of openings 41 smaller than the dimension of the vibration surface 31 on the front surface of the vibration surface 31.
